

Interview Marathon Day

Company Worksheet

Your name: _____

You will be taking on the role of a company who is hiring data scientists, and interviewing three candidates. You will need to make a hiring decision at the end of the day. This worksheet is to help you generate good questions for your half-hour interviews. All of this information should be discoverable, and if it isn't then feel free to come up with your own answer. Inspiration for good questions can be found on the GitHub at [interview-prep/technical-questions](https://github.com/interview-prep/technical-questions).

Company Name: _____ (Choose any hiring for data science)

Company's Product: _____

What are data scientists doing to improve the product right now?

What will your internal team be doing six months from now?

What are the specific skills you're looking for in your next hire?

What is your company culture, and how will ideal candidates show fit in the behavioral interview?
(For example, larger companies have guides to this online such as Amazon's Leadership Principles)

What are the technical challenges you're facing? What does your data look like, and what technical questions should your candidates answer? (SQL? Machine Learning? Others?)

Write three major technical questions your company cares about answering:
