Do all sections of the SQLZoo tutorial (sections 0 through 10) http://sqlzoo.net/.

This will come close to being enough for interviews, but if you finish and / or are already solid on SQLZoo, see
the intermediate and advanced topics at SQL School.

You can work alone or in your pairs from yesterday (or find someone new to pair with!)

Trevor and Jai are subject matter experts here, and have offered to field questions from you that come up - take
advantage of the opportunity!

Thanks for your hard work today.

Please write to me letting me know what section you got to in SQLZoo – having a sense for the distribution over
the class will help me plan for tomorrow.
