We'll continue working on Chapter 3 – Chapter 5 of the book by Gelman and Hill, *Data Analysis Using
Regression and Multilevel/Hierarchical Models*.

For those of you who are ahead / finish early,

Take a look at the Wisconsin Longitudinal Study http://www.ssc.wisc.edu/wlsresearch/, and predict the variable
"yrer74" for male graduates in terms of variables that were collected in 1957. You can get the complete dataset
here http://www.ssc.wisc.edu/wlsresearch/data/downloads/. Be careful when handling missing values and
skewed distributions.
